Contents of Volume 70

NUMBER 1, SEPTEMBER 1987

Special Issue in Honor of Dr. Franz Jellinek
Guest Editors: C. Haas and G. V. Subba Rao

HAAS AND G. V. SUBBA RAO. Dedication to Franz Jellinek 1

R. RONDA, J. H. VAN DER MEER, A. A. VAN HEUZEN, AND C. HAAS. Photoluminescence and Thermoluminescence of 4H-CdI_2 3

REINHOLD WOLF UND RUDOLF HOPPE. Ein neues Oxopraseodymat(IV): Li_2PrO_3 12

H. GERSS, W. JEITSCHKO, L. BOONK, J. NIENTIEDT, J. GROBE, E. MÖRSEN, AND A. LESON. Preparation and Crystal Structure of Superconducting Y_2FeC_4 and Isotypic Lanthanoid Iron Carbides 19

BRONGER, J. FLEISCHHAUER, H. MARZI, G. RAABE, W. SCHLEKER, AND T. SCHUSTER. Structure and Bonding in $[M_6X_8]$ Units of Nonmetallic Transition Metal Cluster Compounds 29

MEERSCHAUT, P. GRENOUILLEAU, L. GUÉMAS, AND J. ROUXEL. Characterization of a Mixed-Chains One-Dimensional Compound 36

NHARD NESPER AND HANS GEORG VON SCHNERING. $Li_{21}Si_5$, a Zintl Phase as well as a Hume-Rothery Phase 48

J. M. BOUWMEESTER, G. A. WIEGERS, AND C. F. VAN BRUGGEN. Magnetic Properties of Ammonia Intercalates of Some IV B and V B Transition Metal Disulfides 58

BERGER. A Phase-Analytical Study of the Tl-Cu-Se System 65

GOCKE, W. SCHRAMM, P. DOLSCHEID, AND R. SCHÖLLHORN. Molybdenum Cluster Chalcogenides Mo_6X_8: Electrochemical Intercalation of Closed Shell Ions Zn^{2+}, Cd^{2+}, and Na^+ 71

A. MOHAN RAM, P. GANGULY, AND C. N. R. RAO. Magnetic Properties of Quasi-Two-Dimensional $La_{1-x}Sr_{1+x}MnO_4$ and the Evolution of Itinerant Electron Ferromagnetism in the $SrO \cdot (La_{1-x}Sr_xMnO_3)_n$ System 82

J. KIM, T.-H. NGUYEN, AND H. F. FRANZEN. The Homogeneity Ranges, Order–Disorder Transition, and Structures of the Nonstoichiometric Monosulfides of Zirconium 88

BLASSE AND N. SABBATINI. A Comparison between "Second-Sphere Effects" in the Excited State Properties of Coordination Compounds and Nonmolecular Solids 93

V. SUBBA RAO, U. V. VARADARAJU, K. A. THOMAS, AND B. SIVASANKAR. Metal Atom Incorporation Studies on the Phases with NZP Structure: $\square NbTiP_3O_{12}$ 101

DEBLIECK, J. VAN LANDUYT, D. VAN DYCK, G. VAN TENDELOO, AND S. AMELINCKX. The Modulated Structure of $Mo_{2.065}S_3$ 108

BLO DE LA MORA AND JOHN B. GOODENOUGH. Lithiated Rare-Earth Thiospinels and Selenospinels 121

ZHOU, D. A. JEFFERSON, AND J. M. THOMAS. A New Structure Type in the Bi_2O_3–Nb_2O_5 System 129

M. ZAHURAK AND D. W. MURPHY. A Method for Controlled Stoichiometry Intercalation of Alkali Metals in Layered Metal Dichalcogenide Crystals 137

HONG WEI SUN, BERNARD TANGUY, JEAN-MAURICE REAU, JEAN-JACQUES VIDEAU, JOSIK PORTIER, AND PAUL HAGENMULLER. Physical and Chemical Characterization and Ionic Conductivity of Rapidly Quenched Glasses in the Sb_2S_3–Ag_2S–AgI System .....

NUMBER 2, OCTOBER 1987

Special Issue in Honor of Dr. Hans Nowotny
Guest Editor: P. Rogl

PETER ROGL. Introduction .....
LIST OF PUBLICATIONS .....
Y. N. GRIN, P. ROGL, K. HIEBL, F. E. WAGNER, AND H. NOËL. Structural Chemistry and Magnetic Behavior of Ternary Gallides $REAu_xGa_{4-x}$, RE = La, Ce, Pr, Nd, and Sm .....
F. WEITZER AND J. C. SCHUSTER. Phase Diagrams of the Ternary Systems Mn, Fe, Co, Ni–Si–N .....
ABDUL K. LABBAN, EDGAR F. WESTRUM, JR., HELMER FJELLVÅG, FREDRIK GRØNVOLD, ARNE KJEKSHUS, AND SVEIN STØLEN. Heat Capacity of $MnAs_{0.88}P_{0.12}$ from 10 to 500 K: Thermodynamic Properties and Transitions .....
P. BLAHA, K. SCHWARZ, F. KUBEL, AND K. YVON. Chemical Bonding in Refractory Transition Metal Compounds with 8, 9, and 10 Valence Electrons.....
W. J. SCHUTTE, J. L. DE BOER, AND F. JELLINEK. Crystal Structures of Tungsten Disulfide and Diselenide .....
ANDERS HÅRSTA AND STIG RUNDQVIST. The Crystal Chemistry of Kappa-Phases
H. EFFENBERGER AND F. PERTLIK. $[As(V)As(III)O_6]^{4-}$: An Uncommon Anion Group in the Crystal Structure of $K_2Cu_3(As_2O_6)_2$.....
F. PERTLIK. The Crystal Structure of $NaAs_4O_6Br$.....
K. CENZUAL, B. CHABOT, AND E. PARTHÉ. Y_2Rh_3Ge, a Rhombohedral Substitution Variant of the $MgCu_2$ Type .....
W. HÖNLE AND K. YVON. Structure and Properties of Triclinic $Ni_{0.85}Mo_6Te_8$.....
E. HELLNER AND W. B. PEARSON. Coordination Formulation of Tetrahedrally Close Packed Structures: An Addendum to the Observations of Yarmolyuk and Kripyakevich .....
P. SCHOBINGER-PAPAMANTELLOS AND K. H. J. BUSCHOW. The Magnetic Phase Diagram of $HoGe_{1-x}Si_x$ Studied by Neutron Diffraction and Magnetic Measurements.....
W. BRONGER, A. KYAS, AND P. MÜLLER. The Antiferromagnetic Structures of $KFeS_2$, $RbFeS_2$, $KFeSe_2$, and $RbFeSe_2$ and the Correlation between Magnetic Moments and Crystal Field Calculations .....
G. BLOCK AND W. JEITSCHKO. $Tb_2Mn_{17}C_{3-x}$ with Filled Th_2Ni_{17}-Type Structure and Some Structural and Magnetic Properties of Related Compounds.....
P. HERZIG, J. REDINGER, R. EIBLER, AND A. NECKEL. Vacancy Induced Changes in the Electronic Structure of Titanium Nitride .....

WINTENBERGER, J. DUGUE, M. GUITTARD, NGUYEN HUY DUNG, AND VO VAN TIEN. Ferro- and Antiferromagnetism in Oxychalcogenides $LnCrOX_2$ (Ln = La or Nd and X = S or Se) 295
EFFENBERGER. Three Modifications of $BaCu(SeO_3)_2$ and the Compound $SrCu(SeO_3)_2$: Preparation and Crystal Structure Determination 303
OESTERREICHER AND H. OESTERREICHER. Nowotny Chimney Ladder Compounds in $Nd_{1+E}Fe_{4-x}Co_xB_4$ 313
KNOTEK AND T. LEYENDECKER. On the Structure of (Ti, Al)N-PVD Coatings 318
GRANNEC, A. YACOUBI, L. FOURNES, A. TRESSAUD, ET P. HAGENMULLER. Non-stoechiométrie dans le système FeF_3–ZrF_4 323

THOR INDEX FOR VOLUME 70 336

The Subject Index for Volume 70 will appear in the December 1987 issue as part of a mulative index for the year 1987.

Information for Authors

Journal of Solid State Chemistry is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields. The Journal also carries a Letters Section.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the content work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions), or notes (brief rapid communications of important new work) which are limited to 1200 words. English, French, and German are the official languages of the Journal but submission of articles in English is encouraged. Manuscripts should be submitted to *Journal of Solid State Chemistry*, Editorial Office, Seventh Floor, 1250 Sixth Avenue, San Diego, California 92101.

Manuscripts should be submitted in quadruplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be designated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Style Guide* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lowercase italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoreproduction and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS).

For material to be deposited, a deposit fee of $25.00 for up to 98 pages of standard-size or 49 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS. Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10163. Remit in advance $4.00 for microfiche copy or for photocopy, $7.75 up to 20 pages plus $.30 for each additional page. All orders must be prepaid. Institutions and Organizations may order by purchase order. However, there is a billing and handling charge for this service of $15. Foreign orders add $4.50 for postage and handling, for the first 20 pages, and $1.00 for additional 10 pages of material, $1.50 for postage of any microfiche orders.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For halftone reproductions, glossy, high-contrast, black and white prints should be submitted.

Illustrations in color can be accepted only if the authors defray the cost. Each figure should be identified on back with the author's name and figure number. Figures are to be cited in the text by consecutive Ar numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed o separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citatio the text. After the reference number, the author's initials, last name, journal name, volume, initial page num and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the s of *Chemical Abstracts Service Source Index*, 1985. For book references, give the author's name, name of b (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's na place and year of publication.

Manuscripts Dealing Primarily with Single-Crystal Structure. The *abstract* should contain the chem formula, crystal system, and space group (Hermann–Mauguin symbol), lattice constants with esd's, Z, and sign cant structural features.

The *experimental* section should contain the following information in as brief a form as possible: chem formula, source of material and its color, lattice constants with esd's, wavelength of the radiation used in th calculation, temperature at which they were measured, type of filter or monochromator, possible space grou (and method of distinguishing between groups with the same absences), Z, crytstal dimensions, absorpt coefficient, method of correcting for absorption, type of data collection, number of reflections measured, num of independent reflections, and agreement factors between multiply measured or equivalent reflections. T description of the structure determination and refinement should indicate a brief outline of the method us sources of f, $\Delta f'$, and $\Delta f''$, final R factors (weighted and unweighted), the function minimized in refinement, t form of weights in the refinement, and the extinction correction (if applied).

Structural results should contain a description of the structure and the following tables: a table of all ato coordinates (with esd's) and important bond distances and angles (with esd's). In those structures where ato displacements or atomic motion is important (ionic conductors, superlattice structures solved as a substructu phase changes, etc.), it may be appropriate to add a table of anisotropic temperature factors. When submittin manuscript three copies of a listing of h, k, l, F_o, F_c (σF_o is optional) must be provided for the reviewers and als if not included in the manuscript, three copies of a table of temperature factors. Authors are strongly encourag to deposit with NAPS structure factor tables, tables of anisotropic temperature factors, all nonessential bo distances and angles, and other supporting structural detail; such material will be retained in the *Journa* editorial office for no longer than one year after publication of the article.

Letters to the Editor. Letters to the Editor will be accepted for publication subject to approval by t communicators, who upon their recommendation for acceptance will forward the manuscript directly to th Editorial Office. Each article should indicate clearly the novelty and urgency of the contribution; it may l helpful to document this more explicitly in an accompanying letter of transmittal. Each communicator mu satisfy himself that the content is not only scientifically sound, but also likely to have such impact as to me rapid publication. Accepted manuscripts will be published on an accelerated publication schedule. The auth will not receive proofs for correction; it is the responsibility of the author to ensure that the manuscript submitted is free of typographical or substantive errors. Letters should be no longer than 1200 words, with a absolute minimum of figures, tables, and references; an abstract not exceeding 150 words should also b provided. Manuscripts should be sent to the Editor, an Associate Editor, or to one of the following members the Editorial Advisory Board: E. F. Bertaut, J. B. Goodenough, P. Hagenmuller, A. Rabenau, C. N. R. Rao, A. Wold. Full addresses for these Board members are listed on the inside front cover of the journal.

Book Reviews. Book Reviews are published on an irregular schedule, and are limited to books whose conte bears directly on the general area of solid state chemistry. Reviews should be submitted directly to the Editor f Book Reviews, Dr. Edward Kostiner, Department of Chemistry and Institute of Materials Science, University Connecticut, Storrs, Connecticut 06268.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms f reprints. There is no page charge.
